

OPERATION AND MAINTENANCE INSTRUCTIONS

- **WARNING.** Use of a lube plate, slick plate or wear plate is not recommended. Such products can alter the king pin dimensions from SAE J700B standards, resulting in premature wear, damage to the king pin and improper coupling. This can occur with or without the Revolver™.
- **DO NOT GREASE FIFTH WHEEL.** This vehicle uses the Revolver™ greaseless coupling system and no grease is required.
- Pre-existing grease on the fifth wheel plate does not interfere with Revolver™ operation.
- Normal maintenance of fifth wheel per manufacturer's specifications is recommended.
- Only routine inspection of the Revolver™ upper coupler plate and king pin is necessary.
